Ten days that changed the course of history. On April 30, 1945, Adolf Hitler committed suicide in a bunker in Berlin. But victory over the Nazi regime was not celebrated in western Europe until May 8, and in Russia a day later, on the ninth. Why did a peace agreement take so much time? How did this brutal, protracted conflict coalesce into its unlikely endgame? After Hitler shines a light on ten fascinating days after that infamous suicide that changed the course of the twentieth century. Combining exhaustive research with masterfully paced storytelling, Michael Jones recounts the Führer’s frantic last stand; the devious maneuverings of his handpicked successor, Karl Dönitz; the grudging respect Joseph Stalin had for Churchill and FDR, as well as his distrust of Harry Truman; the bold negotiating by General Dwight D. Eisenhower that hastened Germany’s surrender but drew the ire of the Kremlin; the journalist who almost scuttled the cease-fire; and the thousands of ordinary British, American, and Russian soldiers caught in the swells of history, from the Red Army’s march on Berlin to the liberation of the Nazis’ remaining concentration camps. Through it all, Jones traces the shifting loyalties between East and West that sowed the seeds of the Cold War and nearly unraveled the Grand Alliance. In this gripping, eloquent, and even-handed narrative, the spring of 1945 comes alive—a fascinating time when nothing was certain, and every second mattered. INCLUDES PHOTOS

The award-winning history of 12 million German-speaking civilians in Europe who were driven from their homes after WWII: “a major achievement” (New Republic). Immediately after the Second World War, the victorious Allies authorized the forced relocation of ethnic Germans from their homes across central and southern Europe to Germany. The numbers were almost unimaginable: between 12 and 14 million civilians, most of them women and children. And the losses were horrifying: at least five hundred thousand people, and perhaps many more, died while detained in former concentration camps, locked in trains, or after arriving in Germany malnourished, and homeless. In this authoritative and objective account, historian R.M. Douglas examines an aspect of European history that few have wished to confront, exploring how the forced migrations were conceived, planned, and executed, and how their legacy reverberates throughout central Europe today. The first comprehensive history of this immense manmade catastrophe, Orderly and Humane is an important study of the largest recorded episode of what we now call "ethnic cleansing." It may also be the most significant untold story of the World War II.

From bestselling author David Nasaw, a sweeping new history of the one million refugees left behind in Germany after WWII In May 1945, after German forces surrendered to the Allied powers, millions of concentration camp survivors, POWs, slave laborers, political prisoners, and Nazi collaborators were left behind in Germany, a nation in ruins. British and American soldiers attempted to repatriate the refugees, but more than a million displaced persons remained in Germany: Jews, Poles, Estonians, Latvians, Lithuanians, Ukrainians, and other Eastern Europeans who refused to go home or had no homes to return to. Most would eventually be resettled in lands suffering from postwar labor shortages, but no nation, including the United States, was willing to accept more than a handful of the 200,000 to 250,000 Jewish men, women, and children who remained trapped in Germany. When in June, 1948, the United States Congress passed legislation permitting the immigration of displaced persons, visas were granted to sizable numbers of war criminals and Nazi collaborators, but denied to 90% of the Jewish displaced persons. A masterwork from acclaimed historian David Nasaw, The Last Million tells the gripping but until now hidden story of postwar displacement and statelessness and of the Last Million, as they crossed from a broken past into an unknowable future, carrying with them their wounds, their fears, their hope, and their secrets. Here for the first time, Nasaw illuminates their incredible history and shows
us how it is our history as well. Millions murdered . . . Millions raped . . . Millions tortured . . . Millions enslaved . . . Millions of men, women and children cast to the winds. No matter what you have read about the Second World War, no matter what you have been told about it, no matter what you believe happened during the so-called "Good War" . . . forget it! Now, for the first time in over 70 years, learn what the war and "peace" looked like to those who lost. Discover what was done to Germany and her people in the name of "freedom, democracy, and liberation." In their own words, in graphic detail, this is their story . . .

The soldiers who occupied Germany after the Second World War were not only liberators: they also brought with them a new threat, as women throughout the country became victims of sexual violence. In this disturbing and carefully researched book, the historian Miriam Gebhardt reveals for the first time the scale of this human tragedy, which continued long after the hostilities had ended. Discussion in recent years of the rape of German women committed at the end of the war has focused almost exclusively on the crimes committed by Soviet soldiers, but Gebhardt shows that this picture is misleading. Crimes were committed as much by the Western Allies - American, French and British - as by the members of the Red Army, and they occurred not only in Berlin but throughout Germany. Nor was the suffering limited to the immediate aftermath of the war. Gebhardt powerfully recounts how raped women continued to be the victims of doctors, who arbitrarily granted or refused abortions, welfare workers, who put pregnant women in homes, and wider society, which even today prefers to ignore these crimes. Crimes Unspoken is the first historical account to expose the true extent of sexual violence in Germany at the end of the war, offering valuable new insight into a key period of 20th century history.

A wartime journal by a reporter and editor living through the Russian occupation of Berlin includes her observations of resident survival in the face of starvation, no water, and freezing conditions; the mass rapes endured by the city's women; and the corruption of Berlin citizens by their Russian occupiers. Reprint. 35,000 first printing.

Throughout history, the Balkans have been a crossroads, a zone of endless military, cultural and economic mixing and clashing between Europe and Asia, Christianity and Islam, Catholicism and Orthodoxy. Subject to violent shifts of borders, rulers and belief systems at the hands of the world's great empires--from the Byzantine to the Habsburg and Ottoman--the Balkans are often called Europe's tinderbox and a seething cauldron of ethnic and religious resentments. Much has been made of the Balkans' deeply rooted enmities. The recent destruction of the former Yugoslavia was widely ascribed to millennial hatreds frozen by the Cold War and unleashed with the fall of communism. In this brilliant account, acclaimed historian Mark Mazower argues that such a view is a dangerously unbalanced fantasy. A landmark reassessment, The Balkans rescues the region's history from the various ideological camps that have held it hostage for their own ends, not least the need to justify nonintervention. The heart of the book deals with events from the emergence of the nation-state onward. With searing eloquence, Mazower demonstrates that of all the gifts bequeathed to the region by modernity, the most dubious has been the ideological weapon of romantic nationalism that has been used again and again by the power hungry as an acid to dissolve the bonds of centuries of peaceful coexistence. The Balkans is a magnificent depiction of a vitally important region, its history and its prospects.

A history of modern European cultural pluralism, its current crisis, and its uncertain future In 2010, the leaders of Germany, Britain, and France each declared that multiculturalism had failed in their countries. Over the past decade, a growing consensus in Europe has voiced similar decrees. But what do these ominous proclamations, from across the political spectrum, mean? Looking at the touchstones of European multiculturalism, from the urgent need for laborers after World War II to the question of French girls wearing headscarves to school,
The Crisis of Multiculturalism in Europe examines the historical development of multiculturalism on the Continent. Rita Chin argues that there were few efforts to institute state-sponsored policies of multiculturalism, and shows that today's crisis of support for cultural pluralism isn't new but actually has its roots in the 1980s. Contending that renouncing the principles of diversity brings social costs, Chin considers how Europe might construct an effective political engagement with its varied population.

A tale of cave bears and comet strikes and a hundred million years of history by the bestselling author of Here on Earth: "Marvelous."—Publishers Weekly (starred review) In Europe: A Natural History, world-renowned scientist, explorer, and conservationist Tim Flannery applies the eloquent interdisciplinary approach he used in his ecological histories of Australia and North America to the story of Europe. He begins 100 million years ago, when the continents of Asia, North America, and Africa interacted to create an island archipelago that would later become the Europe we know today. It was on these ancient tropical lands that the first distinctly European organisms evolved. Flannery teaches us about Europe's midwife toad, which has endured since the continent's beginning, while elephants, crocodiles, and giant sharks have come and gone. He explores the monumental changes wrought by the devastating comet strike and shows how rapid atmospheric shifts transformed the European archipelago into a single landmass during the Eocene. As the story moves through millions of years of evolutionary history, Flannery eventually turns to our own species, describing the immense impact humans had on the continent's flora and fauna—within 30,000 years of our arrival in Europe, the woolly rhino, the cave bear, and the giant elk, among others, would disappear completely. The story continues right up to the present, as Flannery describes Europe's leading role in wildlife restoration, and then looks ahead to ponder the continent's future: with advancements in gene editing technology, European scientists are working to recreate some of the continent's lost creatures, such as the great ox of Europe's primeval forests and even the woolly mammoth.

On May 8, 1945 the shooting ended in Europe. But, shockingly, the war against Germany went on. Roosevelt, Stalin and Churchill had decreed that the German people must suffer—and suffer they did. Driven from their homes, looted of their property, decimated by famine and disease, raped, robbed, and enslaved, millions of Germans-most of them women and children-bore the brunt of what Time magazine called "history's most terrifying peace." Gruesome Harvest was one of the first books in America to sound the alarm against the victor's postwar war against the Germans. Bristling with contemporary documentation, burning with humanitarian and patriotic outrage, this informed, riveting classic dares to tell the shameful story of how American and Allied policy makers undertook the political, economic, and social destruction of the German people even as they presumed to instruct them in "justice" and "democracy." Today, as the propaganda war against the Germans wears on in the media and academic life, Gruesome Harvest, written in 1947 by a courageous American, when the decimation of the German race was still official U.S.-Allied policy, tells a vital story, one that must not be suppressed or forgotten. "If war should come, whichever side may claim ultimate victory, nothing is more certain that victor and vanquished alike would glean a gruesome harvest of human misery and suffering."—Prime Minister Neville Chamberlain, July 31, 1939, to the House of Commons.

At the end of World War II, long before an Allied victory was assured and before the scope of the atrocities orchestrated
by Hitler would come into focus or even assume the name of the Holocaust, Allied forces had begun to prepare for its aftermath. Taking cues from the end of the First World War, planners had begun the futile task of preparing themselves for a civilian health crisis that, due in large part to advances in medical science, would never come. The problem that emerged was not widespread disease among Europe’s population, as anticipated, but massive displacement among those who had been uprooted from home and country during the war. Displaced Persons, as the refugees would come to be known, were not comprised entirely of Jews. Millions of Latvians, Poles, Ukrainians, and Yugoslavs, in addition to several hundred thousand Germans, were situated in a limbo long overlooked by historians. While many were speedily repatriated, millions of refugees refused to return to countries that were forever changed by the war—a crisis that would take years to resolve and would become the defining legacy of World War II. Indeed many of the postwar questions that haunted the Allied planners still confront us today: How can humanitarian aid be made to work? What levels of immigration can our societies absorb? How can an occupying power restore prosperity to a defeated enemy? Including new documentation in the form of journals, oral histories, and essays by actual DPs unearthed during his research for this illuminating and radical reassessment of history, Ben Shephard brings to light the extraordinary stories and myriad versions of the war experienced by the refugees and the new United Nations Relief and Rehabilitation Administration that would undertake the responsibility of binding the wounds of an entire continent. Groundbreaking and remarkably relevant to conflicts that continue to plague peacekeeping efforts, The Long Road Home tells the epic story of how millions redefined the notion of home amid painstaking recovery.

A chronicle of the United States and Allied forces’ involvement in World War II Europe, including the political and social motivations for entering the war as well as major air, land, and sea campaigns.

A marvelous global history of the pivotal year 1945 as a new world emerged from the ruins of World War II Year Zero is a landmark reckoning with the great drama that ensued after war came to an end in 1945. One world had ended and a new, uncertain one was beginning. Regime change had come on a global scale: across Asia (including China, Korea, Indochina, and the Philippines, and of course Japan) and all of continental Europe. Out of the often vicious power struggles that ensued emerged the modern world as we know it. In human terms, the scale of transformation is almost impossible to imagine. Great cities around the world lay in ruins, their populations decimated, displaced, starving. Harsh revenge was meted out on a wide scale, and the ground was laid for much horror to come. At the same time, in the wake of unspeakable loss, the euphoria of the liberated was extraordinary, and the revelry unprecedented. The postwar years gave rise to the European welfare state, the United Nations, decolonization, Japanese pacifism, and the European Union. Social, cultural, and political “reeducation” was imposed on vanquished by victors on a scale that also had no historical
precedent. Much that was done was ill advised, but in hindsight, as Ian Buruma shows us, these efforts were in fact relatively enlightened, humane, and effective. A poignant grace note throughout this history is Buruma’s own father’s story. Seized by the Nazis during the occupation of Holland, he spent much of the war in Berlin as a laborer, and by war’s end was literally hiding in the rubble of a flattened city, having barely managed to survive starvation rations, Allied bombing, and Soviet shock troops when the end came. His journey home and attempted reentry into “normalcy” stand in many ways for his generation’s experience. A work of enormous range and stirring human drama, conjuring both the Asian and European theaters with equal fluency, Year Zero is a book that Ian Buruma is perhaps uniquely positioned to write. It is surely his masterpiece.

Between 1492 and 1914, Europeans conquered 84 percent of the globe. But why did Europe establish global dominance, when for centuries the Chinese, Japanese, Ottomans, and South Asians were far more advanced? In Why Did Europe Conquer the World?, Philip Hoffman demonstrates that conventional explanations—such as geography, epidemic disease, and the Industrial Revolution—fail to provide answers. Arguing instead for the pivotal role of economic and political history, Hoffman shows that if certain variables had been different, Europe would have been eclipsed, and another power could have become master of the world. Hoffman sheds light on the two millennia of economic, political, and historical changes that set European states on a distinctive path of development, military rivalry, and war. This resulted in astonishingly rapid growth in Europe's military sector, and produced an insurmountable lead in gunpowder technology. The consequences determined which states established colonial empires or ran the slave trade, and even which economies were the first to industrialize. Debunking traditional arguments, Why Did Europe Conquer the World? reveals the startling reasons behind Europe's historic global supremacy.

Constitutional Idolatry and Democracy investigates the increasingly important subject of constitutional idolatry and its effects on democracy. Focussed around whether the UK should draft a single written constitution, it suggests that constitutions have been drastically and persistently over-sold throughout the years, and that their wider importance and effects are not nearly as significant as constitutional advocates maintain. Chapters analyse whether written constitutions can educate the citizenry, invigorate voter turnout, or deliver ‘We the People’ sovereignty.

From the ashes of World War II to the conflict over Iraq, William Hitchcock examines the miraculous transformation of Europe from a deeply fractured land to a continent striving for stability, tolerance, democracy, and prosperity. Exploring the role of Cold War politics in Europe’s peace settlement and the half century that followed, Hitchcock reveals how leaders such as Charles de Gaulle, Willy Brandt, and Margaret Thatcher balanced their nations’ interests against the demands of the reigning superpowers, leading to great strides in economic and political unity. He re-creates Europeans’
struggles with their troubling legacy of racial, ethnic, and national antagonism, and shows that while divisions persist, 
Europe stands on the threshold of changes that may profoundly shape the future of world affairs.
Savage Continent
Europe in the Aftermath of World War II
St. Martin's Press
A look at how our monuments to World War II shape the way we think about the war by an award-winning historian. Keith 
Lowe, an award-winning author of books on WWII, saw monuments around the world taken down in political protest and 
began to wonder what monuments built to commemorate WWII say about us today. Focusing on these monuments, 
Prisoners of History looks at World War II and the way it still tangibly exists within our midst. He looks at all aspects of the 
war from the victors to the fallen, from the heroes to the villains, from the apocalypse to the rebuilding after devastation. 
He focuses on twenty-five monuments including The Motherland Calls in Russia, the US Marine Corps Memorial in the 
USA, Italy’s Shrine to the Fallen, China’s Nanjin Massacre Memorial, The A Bomb Dome in Hiroshima, the balcony at 
Yad Vashem in Jerusalem and The Liberation Route that runs from London to Berlin. Unsurprisingly, he finds that 
different countries view the war differently. In monuments erected in the US, Lowe sees triumph and patriotic dedications 
to the heroes. In Europe, the monuments are melancholy, ambiguous and more often than not dedicated to the victims. 
In these differing international views of the war, Lowe sees the stone and metal expressions of sentiments that imprison 
us today with their unchangeable opinions. Published on the 75th anniversary of the end of the war, Prisoners of History 
is a 21st century view of a 20th century war that still haunts us today.
Mapping the class divisions that run throughout Europe Over the last ten years - especially with the 'no' votes in the 
French and Dutch referendums in 2010, and the victory for Brexit in 2016 - the issue of Europe has been placed at the 
centre of major political conflicts. Each of these crises has revealed profound splits in society, which are represented in 
terms of an opposition between those countries on the losing and those on the winning sides of globalisation. Inequalities 
beyond those between nations are critically absent from the debate. Based on major European statistical surveys, the 
new research in this work presents a map of social classes inspired by Pierre Bourdieu's sociology. It reveals the 
common features of the working class, the intermediate class and the privileged class in Europe. National features 
combine with social inequalities, through an account of the social distance between specific groups in nations in the 
North and in the countries of the South and East of Europe. The book ends with a reflection on the conditions that would 
be required for the emergence of a Europe-wide social movement.
Finalist for the Pulitzer Prize • Winner of the Council on Foreign Relations Arthur Ross Book Award • One of the New 
Journal “Magisterial . . . It is, without a doubt, the most comprehensive, authoritative, and yes, readable postwar history.”
—The Boston Globe Almost a decade in the making, this much-anticipated grand history of postwar Europe from one of the world's most esteemed historians and intellectuals is a singular achievement. Postwar is the first modern history that covers all of Europe, both east and west, drawing on research in six languages to sweep readers through thirty-four nations and sixty years of political and cultural change—all in one integrated, enthralling narrative. Both intellectually ambitious and compelling to read, thrilling in its scope and delightful in its small details, Postwar is a rare joy. Judt's book, Ill Fares the Land, republished in 2021 featuring a new preface by bestselling author of Between the World and Me and The Water Dancer, Ta-Nehisi Coates.

Drawing on unique research and rich data on cross-border practices, this book offers an empirically-based view on Europeans' interconnections in everyday life. It looks at the ways in which EU residents have been getting closer across national frontiers: in their everyday experiences of foreign countries – work, travel, personal networks – but also their knowledge, consumption of foreign products, and attitudes towards foreign culture. These evolving European dimensions have been enabled by the EU-backed legal opening to transnational economic and cultural transactions, while also differing according to national contexts. The book considers how people reconcile their increasing cross-border interconnections and a politically separating Europe of nation states and national interests.

The Second World War left Europe in chaos. Landscapes had been ravaged, entire cities razed and more than 35 million people killed. Across most of the continent, the institutions that we now take for granted - such as the police, the media, transport, local and national government - were either entirely absent or hopelessly compromised. Crime rates soared, economies collapsed, and the European population hovered on the brink of starvation. In this groundbreaking study of the years that followed the war, Keith Lowe describes a continent still racked by violence, where large sections of the population had yet to accept that the war was over. He outlines the warped morality and the insatiable urge for vengeance that were the legacy of the conflict. He describes the ethnic cleansing and civil wars that tore apart the lives of ordinary people from the Baltic Sea to the Mediterranean, and the establishment of a new world order that finally brought stability to a shattered continent. These were themes, he shows, that existed across the whole of Europe – east and west. Based on original documents, interviews and scholarly literature in eight different languages, Savage Continent is a window on the brief, chaotic period between the end of World War II and the beginning of the Cold War. It is the first major history of the period in any language.

"Have we really come so far, when a tour of the Continent is so desirable a thing? We've traded our swords for treaties, our daggers for promises—but our thirst for violence has never been quelled. And that's the crux of it—it can't be quelled. It's human nature." For her sixteenth birthday, Vaela Sun receives the most coveted gift in all the Spire—a trip to the
Continent. It seems an unlikely destination for a holiday: a cold, desolate land where two nations remain perpetually locked in combat. Most citizens lucky enough to tour the Continent do so to observe the spectacle and violence of battle, a thing long vanished in the peaceful realm of the Spire. For Vaela, the war holds little interest. As a talented apprentice cartographer and a descendant of the Continent herself, she sees the journey as a dream come true: a once-in-a-lifetime opportunity to improve upon the maps she’s drawn of this vast, frozen land. But Vaela’s dream all too quickly turns to nightmare as the journey brings her face-to-face with the brutal reality of a war she’s only read about. Observing from the safety of a heli-plane, Vaela is forever changed by the sight of the bloody battle being waged far beneath her. And when a tragic accident leaves her stranded on the Continent, Vaela finds herself much closer to danger than she’d ever imagined—and with an entirely new perspective as to what war truly means. Starving, alone and lost in the middle of a war zone, Vaela must try to find a way home—but first, she must survive.

"Chilling... To Hell and Back should be required reading in every chancellery, every editorial cockpit and every place where peevish Euroskeptics do their thinking.... Kershaw documents each and every ‘ism’ of his analysis with extraordinary detail and passionate humanism."—The New York Times Book Review

The Penguin History of Europe series reaches the twentieth century with acclaimed scholar Ian Kershaw’s long-anticipated analysis of the pivotal years of World War I and World War II. The European catastrophe, the long continuous period from 1914 to 1949, was unprecedented in human history—an extraordinarily dramatic, often traumatic, and endlessly fascinating period of upheaval and transformation. This new volume in the Penguin History of Europe series offers comprehensive coverage of this tumultuous era. Beginning with the outbreak of World War I through the rise of Hitler and the aftermath of the Second World War, award-winning British historian Ian Kershaw combines his characteristic original scholarship and gripping prose as he profiles the key decision makers and the violent shocks of war as they affected the entire European continent and radically altered the course of European history. Kershaw identifies four major causes for this catastrophe: an explosion of ethnic-racist nationalism, bitter and irreconcilable demands for territorial revisionism, acute class conflict given concrete focus through the Bolshevik Revolution, and a protracted crisis of capitalism. Incisive, brilliantly written, and filled with penetrating insights, To Hell and Back offers an indispensable study of a period in European history whose effects are still being felt today.

A history of the Chinese experience in WWII, named a Book of the Year by both the Economist and the Financial Times: “Superb” (The New York Times Book Review). In 1937, two years before Hitler invaded Poland, Chinese troops clashed with Japanese occupiers in the first battle of World War II. Joining with the United States, the Soviet Union, and Great Britain, China became the fourth great ally in a devastating struggle for its very survival. In this book, prize-winning
historian Rana Mitter unfurls China’s drama of invasion, resistance, slaughter, and political intrigue as never before. Based on groundbreaking research, this gripping narrative focuses on a handful of unforgettable characters, including Chiang Kai-shek, Mao Zedong, and Chiang's American chief of staff, “Vinegar Joe” Stilwell—and also recounts the sacrifice and resilience of everyday Chinese people through the horrors of bombings, famines, and the infamous Rape of Nanking. More than any other twentieth-century event, World War II was crucial in shaping China’s worldview, making Forgotten Ally both a definitive work of history and an indispensable guide to today’s China and its relationship with the West.

The captivating story of the famed Savoy Hotel’s founders, told through three generations—and one hundred years—of glamour and high society. For the gondoliers-themed birthday dinner, the hotel obligingly flooded the courtyard to conjure the Grand Canal of Venice. Dinner was served on a silk-lined floating gondola, real swans were swimming in the water, and as a final flourish, a baby elephant borrowed from London Zoo pulled a five-foot high birthday cake. In three generations, the D'Oyly Carte family and London's Savoy Hotel pioneered the idea of the luxury hotel and the modern theater, propelled Gilbert and Sullivan to lasting stardom, made Oscar Wilde a transatlantic celebrity, inspired a P. G. Wodehouse series, and popularized early jazz, electric lights, and Art Deco. Following the history of the iconic Savoy Hotel through three generations of the D'Oyly Carte family, The Secret Life of the Savoy brings to life the extraordinary cultural legacy of the most famous hotel in the world.

In the last days of July 1943, British and American planes dropped 9,000 tons of bombs with the intention of erasing the German city from the map. The resultant firestorm burned for a month and left 40,000 civilians dead. Inferno is a searing account of terrifying destruction: of how and why the Allies dropped a hail of high-explosive and incendiary bombs; of blizzards of sparks, hurricane-force winds and 800-degree temperatures; of survivors cowering in basements or struggling along melting streets; of a city and its people near annihilated from above. Inferno is an epic story of human devastation and survival against impossible odds. Compelling, startling and gripping. The definitive account of a great tragedy.' A.C. Grayling, Financial Times 'Admirable, impeccably researched and engagingly written . . . deserves its place on the shelves.' Daily Telegraph 'Brilliantly researched. Lowe has produced many new first-hand accounts which give a human face to a tale of epic destruction.' Daily Express 'Scrupulous . . . sensitive to all the paradoxes of the bombing war.' Richard Overy, Literary Review 'Exemplary.' Observer

The collapse of the Third Reich in 1945 was an event nearly unprecedented in history. Only the fall of the Roman Empire fifteen hundred years earlier compares to the destruction visited on Germany. The country's cities lay in ruins, its economic base devastated. The German people stood at the brink of starvation, millions of them still in POW camps. This was the starting point as the Allies set out to build a humane,
democratic nation on the ruins of the vanquished Nazi state—arguably the most monstrous regime the world has ever seen. In Exorcising Hitler, master historian Frederick Taylor tells the story of Germany’s Year Zero and what came next. He describes the bitter endgame of war, the murderous Nazi resistance, the vast displacement of people in Central and Eastern Europe, and the nascent cold war struggle between Soviet and Western occupiers. The occupation was a tale of rivalries, cynical realpolitik, and blunders, but also of heroism, ingenuity, and determination—not least that of the German people, who shook off the nightmare of Nazism and rebuilt their battered country. Weaving together accounts of occupiers and Germans, high and low alike, Exorcising Hitler is a tour de force of both scholarship and storytelling, the first comprehensive account of this critical episode in modern history.

ECONOMIST BOOKS OF THE YEAR 2016 'A scintillating, encyclopaedic history, rich in detail from the arcane to the familiar... a veritable tour de force' Richard Overy, New Statesman 'Transnational history at its finest ... social, political and cultural themes swirl together in one great canvas of immense detail and beauty' Gerard DeGroot, The Times 'Dazzlingly erudite and entertaining' Dominic Sandbrook, The Sunday Times A masterpiece which brings to life an extraordinarily turbulent and dramatic era of revolutionary change. The Pursuit of Power draws on a lifetime of thinking about nineteenth-century Europe to create an extraordinarily rich, surprising and entertaining panorama of a continent undergoing drastic transformation. The book aims to reignite the sense of wonder that permeated this remarkable era, as rulers and ruled navigated overwhelming cultural, political and technological changes. It was a time where what was seen as modern with amazing speed appeared old-fashioned, where huge cities sprang up in a generation, new European countries were created and where, for the first time, humans could communicate almost instantly over thousands of miles. In the period bounded by the Battle of Waterloo and the outbreak of World War I, Europe dominated the rest of the world as never before or since: this book breaks new ground by showing how the continent shaped, and was shaped by, its interactions with other parts of the globe. Richard Evans explores fully the revolutions, empire-building and wars that marked the nineteenth century, but the book is about so much more, whether it is illness, serfdom, religion or philosophy. The Pursuit of Power is a work by a historian at the height of his powers: essential for anyone trying to understand Europe, then or now.

WARNING: This is not the actual book Savage Continent by Keith Lowe. Do not buy this Summary, Review & Analysis if you are looking for a full copy of this great book. We have already read Savage Continent and pulled out some of the key points, and insights to give you a comprehensive chapter-by-chapter summary & review. In doing so, unfortunately we do not have the space to include all of the many important ideas and anecdotes found in Savage Continent. To get it all, you should first order the full book. Packaged together in an engaging and easily digestible format, this concise summary & analysis works best as an unofficial guide or companion to read alongside the book. A SUMMARY OF KEITH LOWE'S SAVAGE CONTINENT: EUROPE IN THE AFTERMATH OF WORLD WAR II Savage Continent attempts to fill a void regarding the immediate post-WWII history of Europe. A great deal has been written about WWII itself, but not much about the period that followed right after, according to the author. It covers approximately the period 1944-49. It also attempts to change an enduring misperception about the rise of Europe from the ashes of WWII. According to this narrative, Europe rose like a Phoenix in an uninterrupted fashion to become an example to the world of peaceful coexistence and economic prosperity. But before doing so, the author maintains that it descended into chaos and anarchy, fueled by the fires of vengeance and unfinished sectarian wars. Renowned historian Keith Lowe previously delved deeply into World War II and its aftermath with his critically acclaimed 2007 book Inferno, which chronicled the American and British air force’s firebombing of Germany. In Savage Continent, Lowe treats us to an unflinching look at the ethnic cleansings, atrocities, and civil and guerrilla wars that WWII spawned, which shaped post-war Europe and continued after WWII officially ended. From familiar
In this summary, you will discover that:

• Mass displacement during the war had brought a fundamental change: It had become conceivable to uproot whole populations in mass ethnic cleansing operations.
• Food and its lack thereof were used as weapons of war and of wider policy.
• In extreme circumstances, civilization and all the moral obligations and exigencies that come with it can be undone and subverted by the need to survive.
• Even the worst catastrophe in history had a silver lining.
• Revenge is one of the most ingrained and powerful of human emotions, rivaling love on the opposite extreme of the spectrum.

From an award-winning historian, a panoramic account of Europe after the depravity of World War II. In 1945, Europe lay in ruins. Some fifty million people were dead, and millions more languished in physical and moral disarray. The devastation of World War II was unprecedented in character as well as in scale. Unlike the First World War, the second blurred the line between soldier and civilian, inflicting untold horrors on people from all walks of life. A continent that had previously considered itself the very measure of civilization for the world had turned into its barbaric opposite. Reconstruction, then, was a matter of turning Europe’s “civilizing mission” inward. In this magisterial work, Oxford historian Paul Betts describes how this effort found expression in humanitarian relief work, the prosecution of war crimes against humanity, a resurgent Catholic Church, peace campaigns, expanded welfare policies, renewed global engagement and numerous efforts to salvage damaged cultural traditions. Authoritative and sweeping, Ruin and Renewal is essential reading for anyone hoping to understand how Europe was transformed after the destruction of World War II.

Why democracies believe they can survive any crisis—and why that belief is so dangerous

Why do democracies keep lurching from success to failure? The current financial crisis is just the latest example of how things continue to go wrong, just when it looked like they were going right. In this wide-ranging, original, and compelling book, David Runciman tells the story of modern democracy through the history of moments of crisis, from the First World War to the economic crash of 2008. A global history with a special focus on the United States, The Confidence Trap examines how democracy survived threats ranging from the Great Depression to the Cuban missile crisis, and from Watergate to the collapse of Lehman Brothers. It also looks at the confusion and uncertainty created by unexpected victories, from the defeat of German autocracy in 1918 to the defeat of communism in 1989. Throughout, the book pays close attention to the politicians and thinkers who grappled with these crises: from Woodrow Wilson, Nehru, and Adenauer to Fukuyama and Obama. In The Confidence Trap, David Runciman shows that democracies are good at recovering from emergencies but bad at avoiding them. The lesson democracies tend to learn from their mistakes is that they can survive them—and that no crisis is as bad as it seems. Breeding complacency rather than wisdom, crises lead to the dangerous belief that democracies can muddle through anything—a confidence trap that may lead to a crisis that is just too big to escape, if it hasn’t already. The most serious challenges confronting democracy today are debt, the war on terror, the rise of China, and climate change. If democracy is to survive them, it must figure out a way to break the confidence trap.

After Germany’s defeat in World War II, Europe lay in tatters. Millions of refugees were dispersed across the continent. Food and fuel were scarce. Britain was bankrupt, while Germany had been reduced to rubble. In July of 1945, Harry Truman, Winston Churchill, and Joseph Stalin gathered in a quiet suburb of Berlin to negotiate a lasting peace: a peace that would finally put an end to the conflagration that had started in 1914, a peace under which Europe could be rebuilt. The award-winning historian Michael Neiberg brings the turbulent Potsdam conference to life, vividly capturing the delegates’ personalities: Truman, trying to escape from the shadow of Franklin Roosevelt, who had...
died only months before; Churchill, bombastic and seemingly out of touch; Stalin, cunning and meticulous. For the first week, negotiations progressed relatively smoothly. But when the delegates took a recess for the British elections, Churchill was replaced—both as prime minister and as Britain’s representative at the conference—in an unforeseen upset by Clement Attlee, a man Churchill disparagingly described as “a sheep in sheep’s clothing.” When the conference reconvened, the power dynamic had shifted dramatically, and the delegates struggled to find a new balance. Stalin took advantage of his strong position to demand control of Eastern Europe as recompense for the suffering experienced by the Soviet people and armies. The final resolutions of the Potsdam Conference, notably the division of Germany and the Soviet annexation of Poland, reflected the uneasy geopolitical equilibrium between East and West that would come to dominate the twentieth century. As Neiberg expertly shows, the delegates arrived at Potsdam determined to learn from the mistakes their predecessors made in the Treaty of Versailles. But, riven by tensions and dramatic debates over how to end the most recent war, they only dimly understood that their discussions of peace were giving birth to a new global conflict.

Singled out by Foreign Affairs for its reporting on “the brutal frontiers of new Europe,” Fortress Europe is the story of how the world’s most affluent region—and history’s greatest experiment with globalization—has become an immigration war zone, where tens of thousands have died in a humanitarian crisis that has galvanized the world’s attention. Journalist Matthew Carr brings to life remarkable human dramas, based on extensive interviews and firsthand reporting from the hot zones of Europe’s immigration battles, in a narrative that moves from the desperate migrant camps at the mouth of the Channel Tunnel in Calais, France, to the chaotic Mediterranean sea, where African migrants have drowned by the thousands. Speaking with key European policy makers, police, soldiers on the front lines, immigrant rights activists, and an astonishing range of migrants themselves, Carr offers a lucid account both of the broad issues at stake in the crisis and its exorbitant human costs. The paperback edition includes a new afterword by the author, which offers an up-to-the-minute assessment of the 2015 crisis and a searing critique of Europe’s response to the new waves of refugees.

In White Trash, Nancy Isenberg upends assumptions about America’s supposedly class-free society and shows how poor whites have been deeply ingrained in the country's history for the past 400 years. They were central to the both the Civil War itself and the rise of the Republican Party, and still today feature in reality TV as entertainment. White trash have always been an integral part of the American identity, and here their history in both culture and politics in explored in depth. A fascinating work that's timely to today's public debate about rich and poor.

Bestselling historian Keith Lowe’s The Fear and the Freedom looks at the astonishing innovations that sprang from WWII and how they changed the world. The Fear and the Freedom is Keith Lowe’s follow-up to Savage Continent. While that book painted a picture of Europe in all its horror as WWII was ending, The Fear and the Freedom looks at all that has happened since, focusing on the changes that were brought about because of WWII—simultaneously one of the most catastrophic and most innovative events in history. It killed millions and eradicated empires, creating the idea of human rights, and giving birth to the UN. It was because of the war that penicillin was first mass-produced, computers were developed, and rockets first sent to the edge of space. The war created new philosophies, new ways of living, new architecture: this was the era of Le Corbusier, Simone de Beauvoir and Chairman Mao. But amidst the waves of revolution and idealism there were also fears of globalization, a dread of the atom bomb, and an unexpressed longing for a past forever gone. All of these things and more came about as direct consequences of the war and continue to affect the world that we live in today. The Fear and the Freedom is the first book to look at all of the changes brought about because of WWII. Based on research from five continents, Keith Lowe’s The Fear and the
Freedom tells the very human story of how the war not only transformed our world but also changed the very way we think about ourselves. The remarkable untold story of France’s courageous, clever vinters who protected and rescued the country’s most treasured commodity from German plunder during World War II. "To be a Frenchman means to fight for your country and its wine." –Claude Terrail, owner, Restaurant La Tour d’Argent In 1940, France fell to the Nazis and almost immediately the German army began a campaign of pillaging one of the assets the French hold most dear: their wine. Like others in the French Resistance, winemakers mobilized to oppose their occupiers, but the tale of their extraordinary efforts has remained largely unknown—until now. This is the thrilling and harrowing story of the French wine producers who undertook ingenious, daring measures to save their cherished crops and bottles as the Germans closed in on them. Wine and War illuminates a compelling, little-known chapter of history, and stands as a tribute to extraordinary individuals who waged a battle that, in a very real way, saved the spirit of France.

Barbed Wire University tells the extraordinary tale of Winston Churchill’s internment of some of the most gifted Jewish refugee writers, professors, artists, and painters of their generation in a camp on the Isle of Man in the Irish Sea. These were men who had fled Hitler’s Germany, found refuge in Britain, and then, in the hysteria of 1940, were held in captivity as a perceived security threat. They turned the camp—Hutchinson Camp—into a school, concert hall, and artistic community. Using memoirs and diaries, some of which have only recently become available in archives, Dave Hannigan pieces together a richly detailed account of what these remarkable men did during their time in captivity. This is a forgotten corner of World War II, and the way these men constructed a Bohemian idyll in the middle of the Irish Sea, their freedom taken from them, is an extraordinary tale of grit and creativity.

The Second World War might have officially ended in May 1945, but in reality it rumbled on for another ten years... The end of the Second World War in Europe is one of the twentieth century's most iconic moments. It is fondly remembered as a time when cheering crowds filled the streets, danced, drank and made love until the small hours. These images of victory and celebration are so strong in our minds that the period of anarchy and civil war that followed has been forgotten. Across Europe, landscapes had been ravaged, entire cities razed and more than thirty million people had been killed in the war. The institutions that we now take for granted - such as the police, the media, transport, local and national government - were either entirely absent or hopelessly compromised. Crime rates were soaring, economies collapsing, and the European population was hovering on the brink of starvation. In Savage Continent, Keith Lowe describes a continent still racked by violence, where large sections of the population had yet to accept that the war was over. Individuals, communities and sometimes whole nations sought vengeance for the wrongs that had been done to them during the war. Germans and collaborators everywhere were rounded up, tormented and summarily executed.
Concentration camps were reopened and filled with new victims who were tortured and starved. Violent anti-Semitism was reborn, sparking murders and new pogroms across Europe. Massacres were an integral part of the chaos and in some places – particularly Greece, Yugoslavia and Poland, as well as parts of Italy and France – they led to brutal civil wars. In some of the greatest acts of ethnic cleansing the world has ever seen, tens of millions were expelled from their ancestral homelands, often with the implicit blessing of the Allied authorities. Savage Continent is the story of post WWII Europe, in all its ugly detail, from the end of the war right up until the establishment of an uneasy stability across Europe towards the end of the 1940s. Based principally on primary sources from a dozen countries, Savage Continent is a frightening and thrilling chronicle of a world gone mad, the standard history of post WWII Europe for years to come. To end a history of World War II at VE Day is to leave the tale half told. Endgame 1945 highlights the gripping personal stories of nine men and women, ranging from soldiers to POWs to war correspondents, who witnessed firsthand the Allied struggle to finish the terrible game at last. Endgame 1945 highlights the gripping personal stories of nine men and women, ranging from soldiers to POWs to war correspondents, who witnessed firsthand the Allied struggle to finish the terrible game at last. Through their ground-level movements, Stafford traces the elaborate web of events that led to the war's real resolution: the deaths of Hitler and Mussolini, the liberation of Buchenwald and Dachau, and the Allies' race with the Red Army to establish a victors' foothold in Europe, to name a few. From Hitler's April decision never to surrender to the start of the Potsdam Conference, Stafford brings an unprecedented focus to the war's "final chapter." Narrative history at its most compelling, Endgame 1945 is the riveting story of three turbulent months that truly shaped the modern world.

Keith Lowe's Savage Continent is an awe-inspiring portrait of how Europe emerged from the ashes of WWII. The end of the Second World War saw a terrible explosion of violence across Europe. Prisoners murdered jailers. Soldiers visited atrocities on civilians. Resistance fighters killed and pilloried collaborators. Ethnic cleansing, civil war, rape and murder were rife in the days, months and years after hostilities ended. Exploring a Europe consumed by vengeance, Savage Continent is a shocking portrait of an until-now unacknowledged time of lawlessness and terror. Praise for Savage Continent: 'Deeply harrowing, distinctly troubling. Moving, measured and provocative. A compelling and plausible picture of a continent physically and morally brutalized by slaughter' Dominic Sandbrook, Sunday Times 'Excellent', Independent 'Unbearable but essential. A serious account of things we never knew and our fathers would rather forget. Lowe's transparent prose makes it difficult to look away from a whole catalogue of horrors...you won't sleep afterwards. Such good history it keeps all the questions boiling in your mind', Scotsman Keith Lowe is widely recognized as an authority on the Second World War, and has often spoken on TV and radio, both in Britain and the United States. He is the author of
the critically acclaimed Inferno: The Devastation of Hamburg, 1943 (Penguin). He lives in north London with his wife and two children.
